**\*\* Online Study Group \*\***

In this study the student will read selected works of British literature in the context of its historical development. The primary text will be The Norton Anthology of British Literature, one volume edition. The student will supplement this text with other readings as individual interests develop. Each student will read the introduction to each section of the anthology. As a group, we will read and discuss Beowulf on the Moodle site. Each student will then choose three additional areas of focus from a list including, but not limited to, the following: traditional ballads; The Canterbury Tales; Renaissance literature -- selections from Shakespeare's contemporaries; John Milton, Puritans and Cavaliers; Dryden, Pope, and Neoclassicism; the birth of the novel; Romanticism; Victorians and pre-Raphaelites; and Modernism and stream of consciousness: Joyce, Woolf, and Eliot. Because of the quantity of material available, and because the goal is to familiarize the student with British literature from a historical perspective, it is likely that the study will focus on pre-Modern works. Topics should be chosen according to interest and to allow the student to explore topics new to him or her. Each student will write critical papers, each approximately 5 pages in length. At least 2 of the papers should incorporate material from sources in addition to the literature. Students will be expected to share their insights through answering questions and journaling in the Moodle site. This study meets the General Education requirement in Humanities OR Basic Communication, not both.
